A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

AD 350

Last Updated on 08.04.2021

Fume extraction system for light duty laser marking, coding and engraving applications.

BOFA's Advantage 350 fume extraction and filtration system effectively removes potentially harmful fumes and particulates created during the laser marking process. By maintaining a dust-free operating area, the system helps to protect valuable equipment, maintain a higher quality mark, and reduce the number of rejects and contaminants.

The quiet and compact Advantage 350 is ideal for use in light duty laser marking applications, including schools, sign making workshops and small scale industrial environments.
